

restorVault

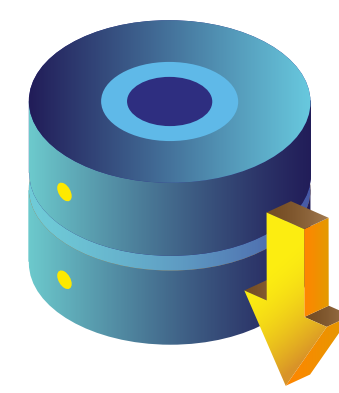

VIRTUAL DATA STORAGE

WHAT DOES RESTORVAULT DO?

restorVault provides virtual data storage solutions to **protect regulatory and high-value data** for government and enterprises from disasters and ransomware.

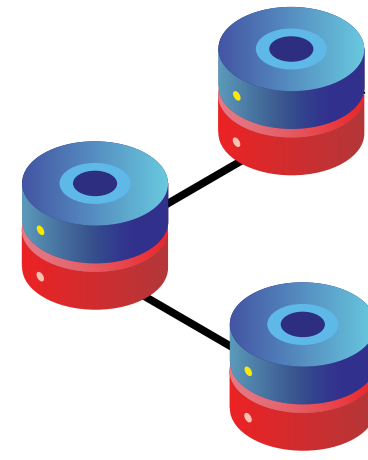

WHY RESTORVAULT?

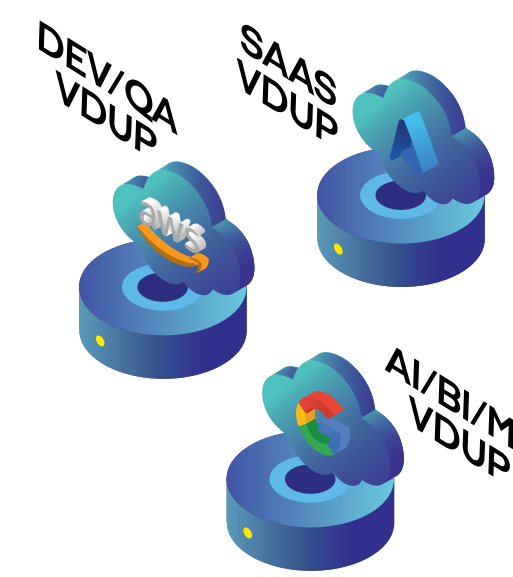

Cut server, backup, and multi-cloud storage costs by **>80%**

Guaranteed Data Integrity

Built-in Hierarchical Storage Management

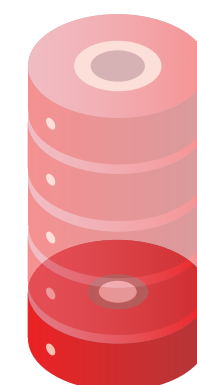

Patented V-Duplication™

UNSTRUCTURED DATA CHALLENGES

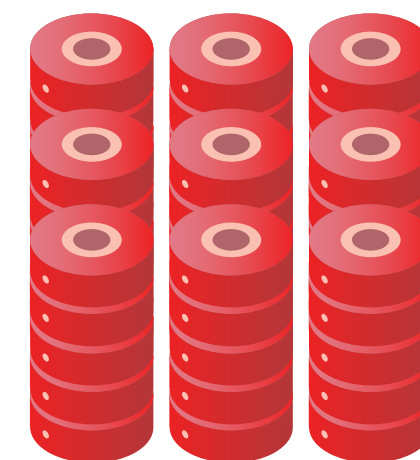

>80% of all data is unstructured, the #1 target of ransomware

THE INACTIVE DATA PROBLEM

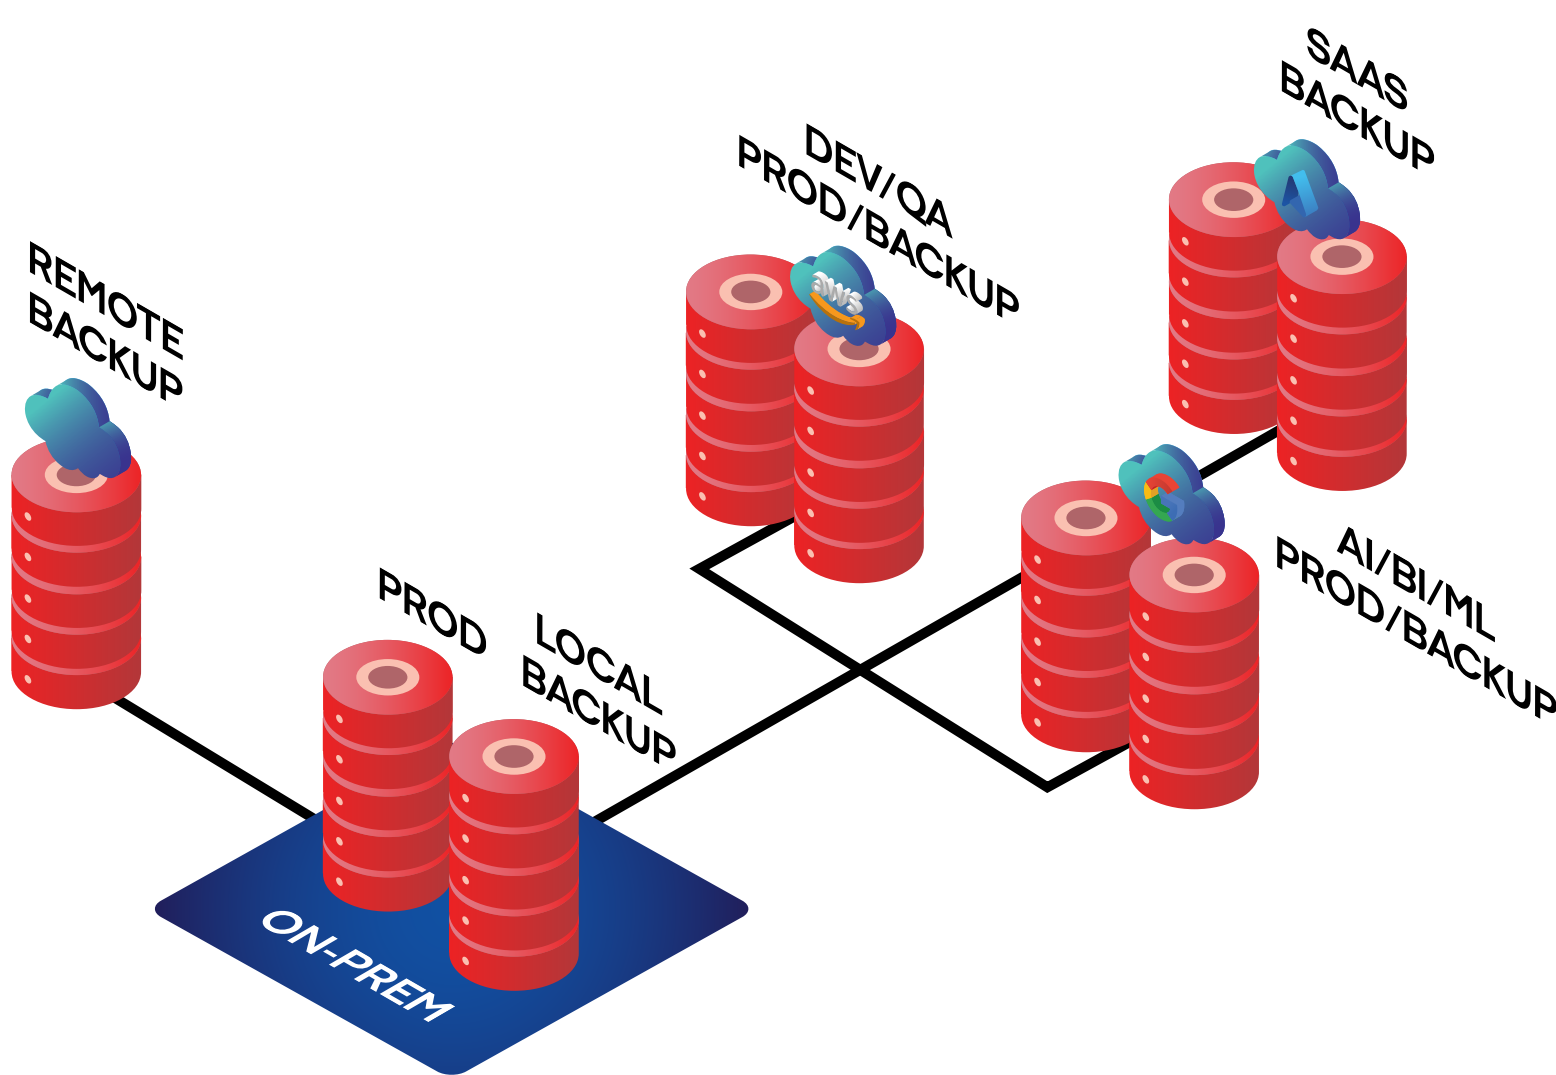

>80% of unstructured data is inactive, rarely used, can't lose

9-10 copies exist, backups, DR, SaaS, compliance and now AI

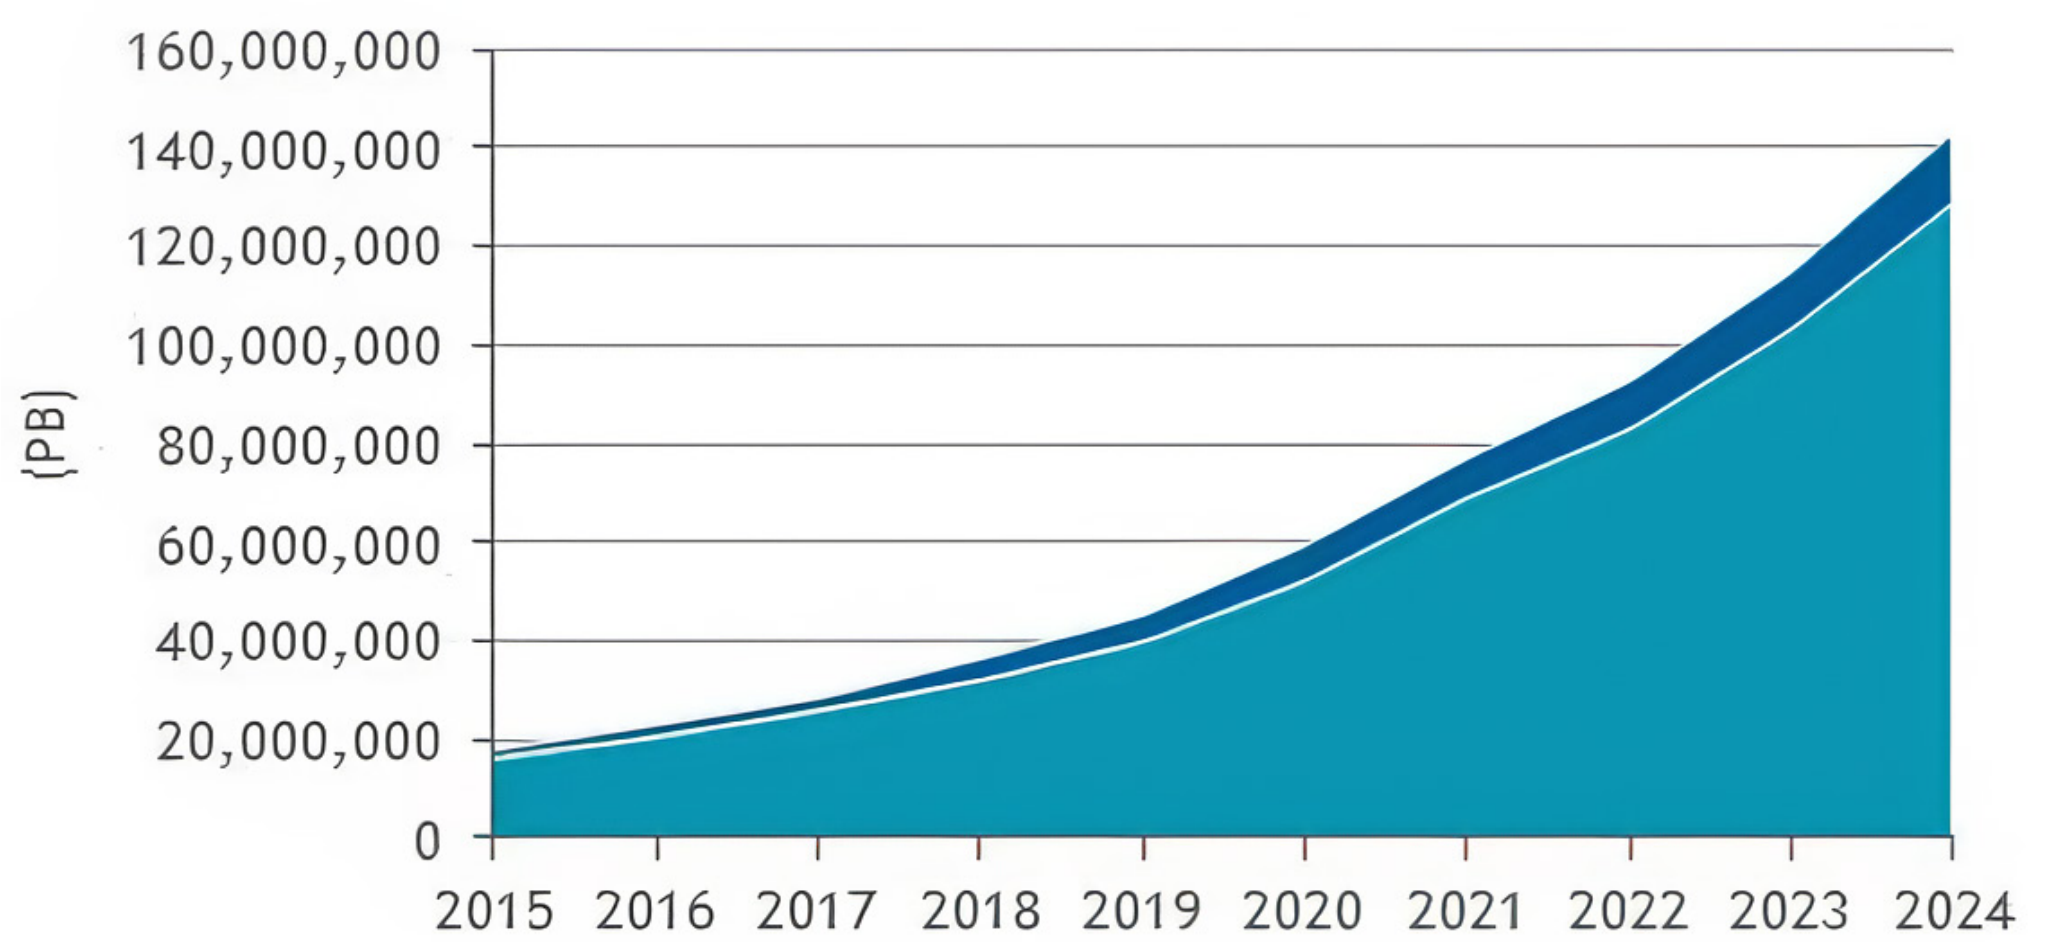

EXISTING CLOUD SOLUTIONS ARE FLAWED

- Inactive data consumes pricey storage
- Backups are vulnerable to ransomware
- Recovery time is long, cloud backup has hidden penalties

IDC'S GLOBAL DATASPHERE

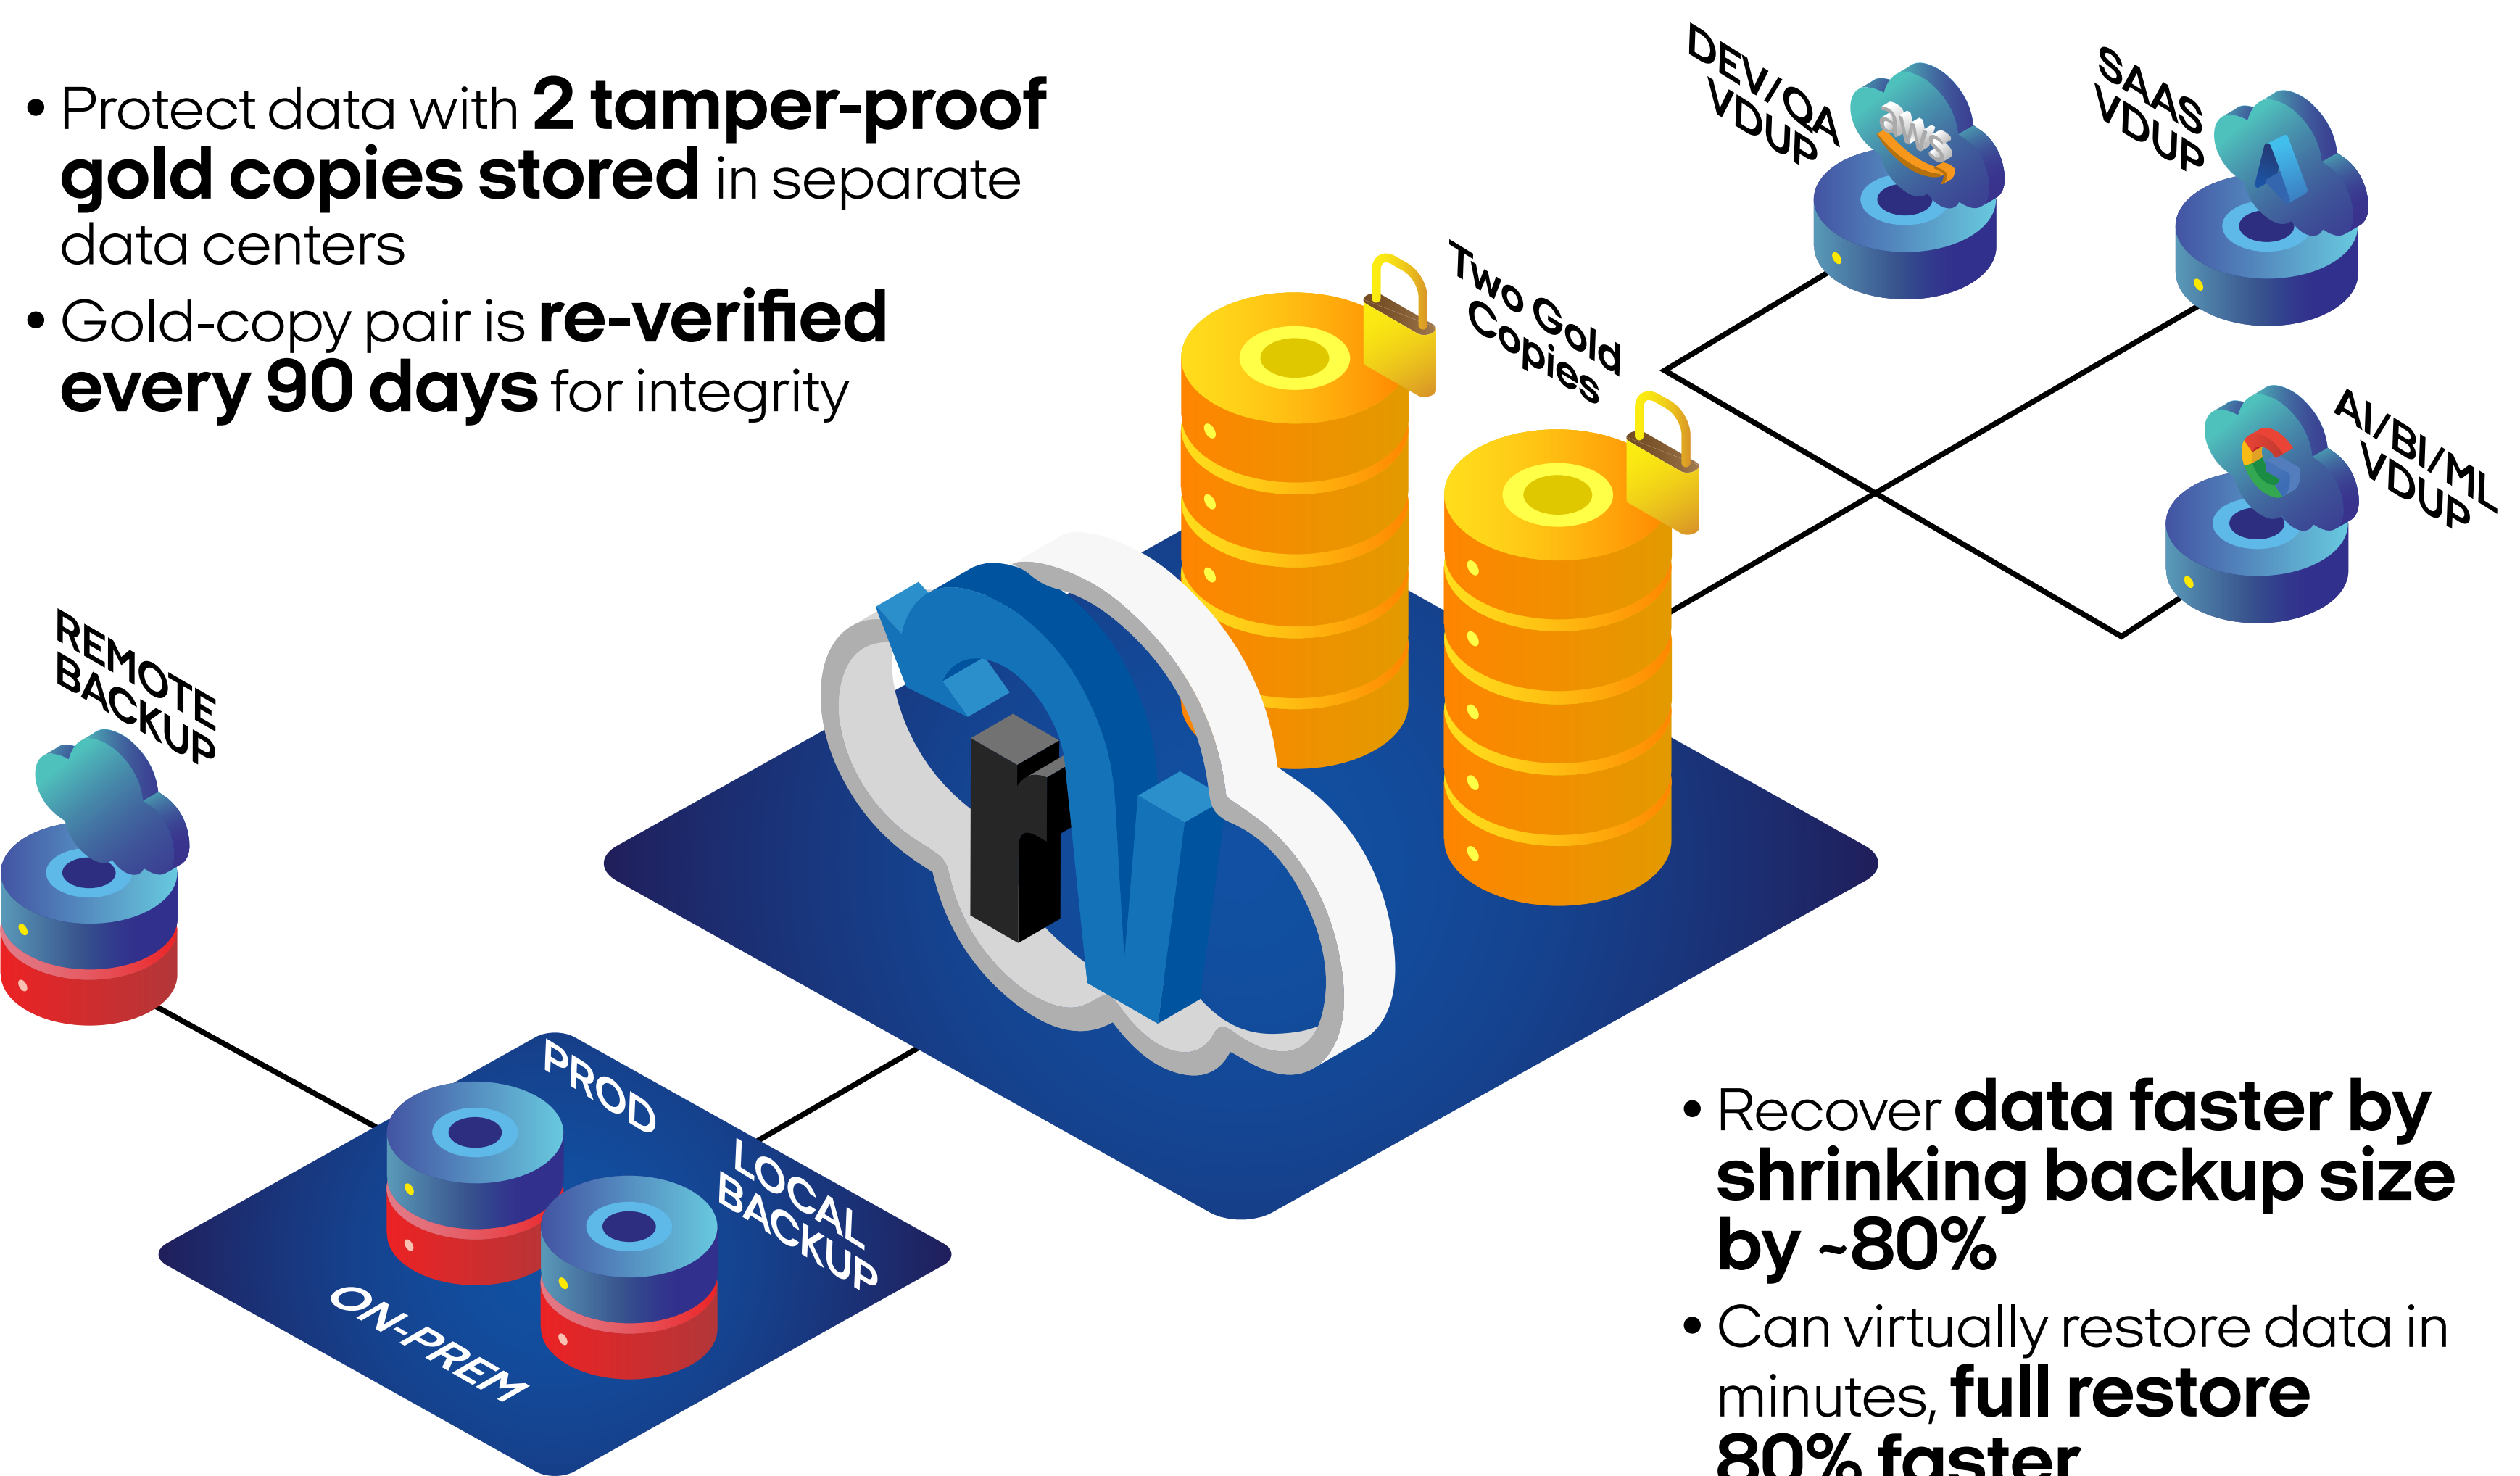

- IDC's Global Data Sphere: The data-to-replication ratio is expected to grow from 1:9 to 1:10 by 2024.
- Secure your data and reduce the growing copy data sprawl.

● Create/Capture ● Replicate/Consume

RESTORVAULT'S SOLUTION

- Protect data with **2 tamper-proof gold copies stored** in separate data centers
- Gold-copy pair is **re-verified every 90 days** for integrity

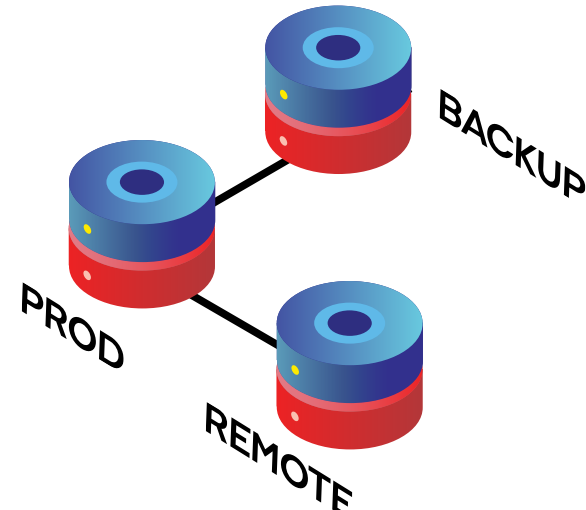

- Recover **data faster by shrinking backup size by ~80%**
- Can virtually restore data in minutes, **full restore 80% faster**

KEY FEATURES

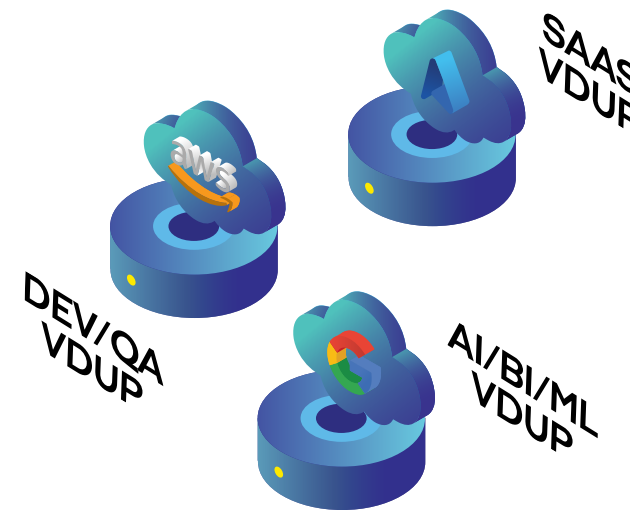

2 Tamperproof Gold Copies

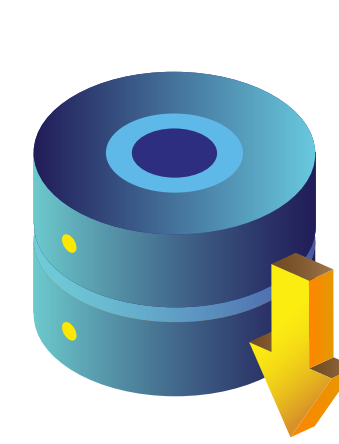

Built-in Inactive Data Virtualization

Patented V-Duplication

>80% storage savings
